ALUTECH shutter and shade solutions

The **MAGNUM** slat profile is the latest in security and storm shutter profiles. Due to its small housing sizes and high ratings, the slat has gained much popularity for security and storm prone areas. Its unique "END RETENTION" guiderail feature allows this shutter to be used with no vertical storm bars and have the slat itself locked in the guiderails with retention bolts

Patented slat locker with screw

Seamless integration with your construction

Retention guiderails
